# HYACINTHS

## NAME-LIST OF HYACINTHS

Hyacinths are not only good for forcing purposes but are also unexcelled for the garden.

With their bright and cheerful colors, nothing adds more to the beauty of the Spring garden than Hyacinths in beds and borders.

For sizes see page 6—7.

### SINGLE RED AND PINK.

**GERTRUDE**, rosy pink, compact flower, good forcing variety, fine for pots.  
Also excellent for bedding.

**Jan Bos**, beautiful rich scarlet, very early.

**LADY DERBY**, fine pink, large bells, fine shaped bulb.

**LA VICTOIRE**, brilliant carmine red, large spike, best for forcing and splendid bedder.

**MARCONI**, deep rosy pink, very recommendable for all purposes.

**PINK PEARL**, rosy pink; large spike; very early. One of the best Hyacinths.

**QUEEN OF THE PINKS**, lovely bright rosy pink; large spike of fine bells late forcer. Also good for bedding.

### SINGLE WHITE

**Arentine Arendsen**, pure white, large truss and large bells, very early.

**Edelweiss**, pure white, sturdy broad compact spike, large fleshy bells, fine early forcer.

**L'INNOCENCE**, pure white, broad loose spike of elegant form, very large well shaped bells, early and excellent for forcing, and a good bedder. The most popular of all white Hyacinths.

**Queen of the Whites**, pure white, splendid spike, very good for late forcing.

**Ostara**, fine porcelain blue.

## SINGLE LIGHT AND DARK BLUE.

**BISMARCK**, light skyblue, large truss, excellent for early forcing.

**Dr. Lieber**, deep blue.

**Dr. Stresemann**, bright blue, large flower.

**DUCHESS OF WESTMINSTER**, beautiful deep blue with striking white centered bells.

**GRAND MAITRE**, fine deep porcelain blue;

**KING OF THE BLUES**, the best dark blue, with splendid, well formed large spike, on short stem; late forcer and good bedder.

**Myosotis**, pale blue; long spike. Good forcer.

**PERLE BRILLIANTE**, fine lavender blue, large spike. Very recommendable variety for forcing and for bedding.

**Queen of the Blues**, fine light blue with beautiful silvery shade, large spike  
Also extra for bedding.

## SINGLE YELLOW

**CITY OF HAARLEM**, yellow, large spike, extra fine.

**Prince Henry**, yellow, early forcer.

**Yellow Hammer**, yellow, large broad well shaped spike.

## SINGLE VIOLET.

**Lord Balfour**, purplish violet, broad fine shaped large truss.

# HOW TO ORDER HYACINTHS

We offer our Hyacinths in various grades as mentioned below. For selection of varieties we beg to refer to name-list on pages 5—6 and 8.

p. 1000  
\$

## TOP SIZE HYACINTHS .....

In this size we offer the finest bulbs which the harvest produces, carefully selected bulbs, producing large flowers. The best for Exhibition purposes.

## FIRST SIZE HYACINTHS .....

This size is just one size below top size and these are also large and carefully selected bulbs, producing large flowers. This is the best size for growing in water on special Hyacinth-glasses.

## SECOND SIZE HYACINTHS .....

This size we can specially recommend for general purposes, these bulbs are excellent for growing in pots and pans and a welcome material for selling in stores.

## THIRD SIZE HYACINTHS .....

Because the flowerspikes of this grade are not so large as those of the larger sized bulbs, this size Hyacinth is recommended for planting 3 or more bulbs in a pot or pan.

This grade is also suitable for bedding purposes.

## BEDDING HYACINTHS

### Named varieties or separate colors .....

This size is also very popular for outside planting. The flowers are not so heavy and will therefore stand rainy and windy weather

## MINIATURE HYACINTHS .....

Miniature Hyacinths generally force earlier than the larger size bulbs. These small bulbs produce very elegant flowers and are of great value for cutflower purposes.

On account of their loosely built flowers, and elegant habit, pans planted with Miniature Hyacinths are very attractive and graceful.

# PREPARED HYACINTHS

(FOR EARLY FORCING)

These Hyacinths are treated in a special way, which makes them well suitable for early forcing; they should be potted directly after arrival.

As the Bulbs are lifted early and have to go through this special process, orders for these bulbs must reach us before June 1st.

These Hyacinths offer a welcome material when other Hyacinths and Tulips are not yet ready.

Prepared Hyacinths are specially suitable for early cutflowers.

We recommend the following varieties:

- VUURBAAK**, scarlet; large, very double flower on strong stem. Good for late forcing and bedding .....
- Collection of best named sorts .....
- Superfine Mixed, separate colors .....
- Superfine Mixed, all colors .....

# DARWIN TULIPS

## „THE ARISTOCRATS OF TULIPDOM“

We know of no other Tulips so useful for various purposes, as the Darwin Tulips, with their bright colors, their large flowers on long graceful stems, their wonderful substance and lasting qualities.

The forcing varieties of the Darwins offer the florist unsurpassed material for cutflowers and potplants from the end of January all through the winter, for Easter and Mothersday.

Darwin Tulips are also splendidly suitable for growing in cool greenhouses or under so called „cold glass“.

For bedding, planting in borders and general gardening purposes, as well as for outside grown cutflowers, there are no better and more pleasing Tulips than the glorious Darwins. No May garden is complete without Darwin Tulips, which possess a beauty and attractiveness all their own.

# SINGLE LATE OR COTTAGE TULIPS

Although some very good forcing Tulips are found in the Single Late Tulips, this class is mostly used for bedding, for planting in borders and general gardening purposes for which they are excellently suitable.

They bloom about at the same time as the Darwin Tulips and this class is specially noted for its wide variation in color, shape and habit of flowers, which make the Single Late Tulips useful also as cutflowers grown outside.

p. 1000

Blue Flag (Blue Celeste), attractive blue .....  
Epicure, old gold with orange yellow glow, enormous large flower ..

MENDEL TULIPS

Mendel Tulips are hybrids between the old Duc van Tol Tulips and Darwins  
Many can be forced early and in a shorter time than most forcing Darwin  
Tulips, some varieties can flower the end of January and easy for Valentine  
Day, either grown in pots or flats for cutflowers.  
Some should be forced later.

p. 1000  
\$

Amidonette, cerise rose, white edged; medium early .....

WEBER, pure white, bordered pink, tall stem, enormous flower;  
medium early .....  
WHITE SAIL, white, early .....  
Zenober, rich vermilion red; early .....  
Collection in varieties our choice .....

# TRIUMPH TULIPS

These are hybrids between Darwin Tulips and early Tulips. They have a very sturdy, robust habit.

Besides beautiful selfcolored kinds, and others of most pleasing two-toned color combinations, there are in the Triumph Tulips also varieties distinctly bordered and edged. They have good lasting qualities.

Several varieties are already very popular with the florists, especially for Easter pans, whilst some varieties can also be forced earlier. As garden Tulips they take a special place as they bloom between the early- and the Darwin and other late flowering kinds, and so fill the gap between these classes.

With their strong habit, beautiful and unusual colors, Triumph Tulips are very effective in the garden.

They are also strongly recommended for exhibition purposes.

p. 1000  
\$

- ALBERIO, cerise scarlet, yellowish edge, good for pots, fine bedder
- Aviateur, deep red, golden yellow bordered, good for forcing .....
- Bandoeng, deep mahogany red with golden edge.....

# NARCISSUS

## (DAFFODILS)

The last few years the collection of Daffodils has been greatly enriched with many new, very beautiful varieties.

In the forcing-, as well as in the show- and garden varieties, great improvements have been attained.

Besides the well known standard varieties, our list also contains a choice assortment of these newer and interesting kinds.

The Royal Horticultural Society of England adopted a revised classification of the **Daffodils**, which is mainly followed in our list.

- I. **Trumpet Daffodils.** Trumpet or crown as long as or longer than the perianth:
  - a. **Ajax yellow (Yellow Trumpets).** Perianth and trumpet yellow.
  - b. **Ajax White (White Trumpets).** Perianth and trumpet white.
  - c. **Ajax Bicolor (Bicolor Trumpets).** Perianth white, trumpet yellow.
- II. **Incomparabilis Daffodils.** Cup or crown measuring from one-third to nearly equal the length of the perianth.
- III. **Barrii Daffodils.** Cup or crown measuring less than one third the length of the perianth.
- IV. **Leedsii Daffodils.** Comprising all the chalice-cupped and short-cupped Narcissi having white perianth and cup or crown of white, cream or pale primrose.
- V. **Jonquils and their Hybrids.**
- VI. **Tazetta (Polyanthus) and their Hybrids.**  
**Poetaz.** Hybrids between Poeticus and Polyanthus sorts.
- VII. **Poeticus Daffodils.** All with snowy white perianth and flattened yellow crown more or less deeply colored with scarlet or crimson.
- VIII. **Double Daffodils.**
- IX. **Various Daffodils.**

Varieties marked \* are suitable for early or medium early forcing.

## YELLOW TRUMPETS

- \***Emperor**, perianth soft yellow; trumpet rich yellow .....
- \***Covent Garden**, uniform yellow .....
- \***Godolphin**, uniform soft yellow, large trumpet .....

- Best mixture of *Leedsii* varieties only .....
- Best mixture of *Poetaz* varieties only .....
- Best mixture of *Poeticus* varieties only .....
- Best mixture of Double varieties only .....
- A grand Mixture of all kinds .....

# Bulbs for Rockgardens

Rockgardening, so popular nowadays, can be made more attractive by the use of bulbs, well selected for this purpose.

The bulbfamily comprises many kinds which can be used to great advantage.

Rockgardens do not reach their prime until Summer, but when **Bulbs** are used the flowering period of a rock-garden will be extended considerably, as Bulbs produce a rich variety of form and color during Spring.

Deep, welldrained pockets of soil are required for planting the bulbs.

The following kinds will be found of special merit: Tulip species: Chrysantha, Clusiana, Eichleri, Fosteriana Red Emperor, Kaufmanniana, Praestans Fusilier, Crocus, Muscari (Grape Hyacinths), Eranthis (Winter Aconite), Galanthus (Snowdrops), Chionodoxa (Glory of the Snow), Fritillaria Meleagris (Guinea Henflower), Scilla sibirica and also the later flowering Scilla campanulata and nutans varieties (Wood-Hyacinths).

Very attractive and useful for Rockgardens, are also the dainty miniature Daffodils listed under „Various Narcissus“.

Further Anemone, Bulbocodium, Allium Moly, Erythronium, Iris reticulata, Tritoleia.

You can make a profit by selling  
bulbs for rockgardens

# CROCUS

This list includes many varieties which are a great improvement upon the old kinds, by their habit, color, shape of flower and free flowering capacities.

	Topsize
BLUE AND PURPLE	p. 1000
	\$
